Hyderabad

SUMMARY

Career Summary

- Around 3 years of experience working as Java Software Developer.
- Strong analytical and logical skills with good knowledge of Object Oriented Programming(OOPs)
- Knowledge in various development life cycle methodologies like AGILE and on phases of SDLC such as planning, requirements, analysis/design, development and testing.

Technical Skills

Programming Languages	:	**Core Java, J2EE**
Frameworks	:	**Spring Core, Spring MVC, Spring Boot, Spring Cloud**
Web Technologies	:	**HTML, CSS, SOAP & Restful WebServices, Web Sockets, Microservices**
Databases	:	**MySql, Derby**
Development Tool(IDE)	:	**Eclipse IDE, Jboss Developer Studio 7**
Interfacing Tools	:	**Jenkins, LARA, Rally**

Current Project

Working for client **American Express** for **Click to Chat Application** as a Software Developer, my roles are:

- To work on code for developing RESTful Web services for calling stored procedure or another service.
- To consume third party Rest api by making a jQuery AJAX call from JavaScript code.
- To resolve UI and Coding defects and provide resolution in provided time frame.
- To do manual testing of the application for bug fixing.

Technology Used: -

- **Java EE 1.7, Spring 4, JQuery, JavaScript, RESTful web services.**

- Language: Java

Training Summary

I have completed four months Cognizant academy training in Advanced Java module. Training also included development of real time Project (MFRP) as Web Application with all working functionalities using Core Java, JSP, Servlets, MySql Database, HTML and CSS.

Projects Handled

Project: Corporate Online Payments   **Client: American Express**   **Team Size: 20**

Environment: Windows 7
Tools: Eclipse, Application servers- Web Sphere, JBoss.
Role: Software Developer

Description: Project deals with processing Payments made through Amex Corporate Cards and processing Allocations for International markets. Projects also deals with managing Enrolments of Authorized Users.

Contribution:
As a team member, I've been involved in
- Generating Stubs form WSDL for consuming the SOAP web services.
- Resolving UI and Coding defects and provide resolution in provided time frame.
- Developing unit, functional and integration test cases using TestNG framework and Spring test module.
- Resolving coding or functional violations raised by CAST Analytics Software.
- Working on migration of application from Web Sphere to JBoss Application Sever.
- Working on configuring JBoss Application Server.
- Testing SOAP web services using Soap UI.
- Manual testing of the application for Bug fixing.

Project: Charge Back Calculation System   **Client: Internal**   **Team Size: 6**

Environment: Windows 7.
Tools: Java J2EE, HTML, JSP.
Architecture: MVC
Role: Designer/Developer

Description:
CBC is a system used for determining portfolio transaction costs driven by client cash flows, and to charge those costs back to the appropriate clients.

Contribution:

As a team member, I've been involved in

- Learnt developing application in MVC framework.
- Developing of SQL Database schema in MySQL.
- Developing frontend UI using JSP, HTML and CSS.
- Worked on developing the servlet controllers for receiving request from UI and providing appropriate response after passing the request through Business and Data Access Layer.

EDUCATION

- **Bachelor of Technology** in **Electronics and Telecommunication Engineering** from **Shri Guru Gobind Singhji Institute of Engineering and Technology**, Nanded (MH), India with **7.00** CGPA.
- **Diploma** in **Electronics and Telecommunication** from **Government Polytechnic** Nagpur (MH) with **90%** marks.

- **10th** from **Hindu Dnyanpeeth Convent** Akola (MH) with **90.61%** marks.
